What's so special about a greenhouse from Maine Garden Products?

MADE IN MAINE! All our greenhouses are made from locally sourced Eastern White Cedar, making them naturally rot and insect resistant without any harmful chemicals. Stain or leave natural to weather to a soft gray.

Lots of sizes and options so the possibilities are nearly endless. Each greenhouse is customized to your individual needs.

We use a high quality triple wall polycarbonate glazing for our greenhouses. It is more heavy duty than the standard double wall and provides more insulating value. The polycarbonate panels have a limited 10 year warranty and we have had very good success with this product. Tempered glass or single wall polycarbonate glazing is available for sidewalls and end walls.

You will work with real people who are familiar with the in's and outs of greenhouse growing. All our greenhouses are manufactured on-site in Howland, Maine.

ABOUT US

Maine Garden Products, a division of Bartlett Bench and Wire, is a small manufacturing company located in Howland, Maine. We started designing our first greenhouse in 2007 and sold our first Greenhouse in 2009. Owner Pike Bartlett however, is no stranger to greenhouse growing and building. Growing up, his family owned and operated greenhouses in Massachusetts. Over the years, the business has continued to grow and expand, improving our design to meet customers needs and expectations.

We would love to talk with you to discuss the many options available. Our main goal is to provide personalized service to each of our customers.

Questions? We love questions! Please don't hesitate to call or email—We are here to help you!

Mainstay Greenhouse

Introducing a brand new line of greenhouses from Maine Garden Products. **Mainstay** greenhouses are constructed from Eastern White Cedar for a long life without the need of treating or staining. The vents are fully automated with Danish made thermo-mechanical openers. Triple wall high quality polycarbonate glazing insulates and traps the heat inside to extend your growing season to the max. 30" wide door for easy access with wheelbarrows and gardening tools. Available with or without hinging wire mesh benches for one or both sidewalls. Sidewalls, endwalls, and door are available with optional clear single layer polycarbonate for no additional charge. Available in natural cedar or with an assortment of stain options.

AVAILABLE SIZES:

8' x 8'

8' x 10'

8' x 12'

10' x 10'

10' x 12'

We designed the Mainstay Greenhouse specifically with ease of assembly in mind. The simpler design makes it an ideal project for a do-it-yourselfer and it is able to ship anywhere in the US.

- 2 Automatic vent openers included (standard)
- Partially assembled in sections for easier on-site assembly
- 60" high sidewalls
- All triple wall Polycarbonate
- All SS exterior fasteners
- 1"x4" base plate for solid anchoring
- 2 - 24"x4' roof vents. (6' long on 12' house)

Freedom Greenhouse

We now offer two styles in our Freedom Greenhouse line. The original “Small” style is available in 8’ x 8’ or 8’ x 12’ sizes and utilizes our “raise the roof” ventilation. Temperature regulation through natural ventilation is achieved by literally “raising the roof” off the gable ends on one side of the greenhouse. Ventilation occurs through **Natural Convection**, which is the rising of warmer air above cooler air. This allows the warmer air to escape through the roof peak and cooler air to be drawn in through the lower section of the roof opening. **Natural Convection** ventilation is extremely effective and requires no external power

Our lineup of large *Freedom* greenhouses uses ridge and sidewall venting to provide great natural ventilation in your greenhouse. The thermostatically controlled system allows owners to control each vent independently, opening or closing only one vent if desired. The roof peak vents have an adjustable control to allow it to only open partially when only a small amount of venting is needed. Sizes from 8’x 16’ to 19’x 54’. 24’ wide coming soon!

The roof opening gear motor and irrigation systems are powered by a 12 volt battery that is charged by the included solar panel.

The 12 volt charging system includes a battery, a 5 or 15 watt solar panel, and a controller for battery regulation and optimizing charge rates.

The charging system is guaranteed to never over charge the battery. Full time desulphation pulses safely extend the life and performance of the battery.

... A revolution in backyard and small farm greenhouses

Both Styles Feature:

- 100% Solar Powered
- Eastern White Cedar
- Triple Wall Polycarbonate
- Thermostatically Controlled
- Adjustable Controls
- Many Sizes
- Customizable to your needs
- Optional Benches & Irrigation

We absolutely love it.
Tomatoes and greens are still growing and viable and it's almost November. Looking forward to a fresh Thanksgiving salad...maybe even at Christmas. Thanks for a quality product!

Freedom Greenshed

All of the same great features of our Freedom Greenhouse but great for those that need a little storage space as well. Solid Cedar back wall.

AVAILABLE SIZES:

8' x 8'

8' x 12'

GREENHOUSE OPTIONS & ACCESSORIES

L.E.D. Lights—12V, only consumes 5W, 50W incandescent equivalent

Rain Gutter—Constructed from PVC, this can have a center or end drop for a collection barrel

Additional Door—Add a door for a second entrance

Drip Tube System -transfer water through a pump in the reservoir up to your plants through small tubes

Stain—choose from a variety of solid or semi transparent stains

High Wind Package—Additional fasteners make our greenhouses more stable and wind resistant

Full Height Glazing—choose one full wall of glazing for your freedom

Tempered glass or single wall polycarbonate glazing is available for sidewalls and gable end walls.

BENCH OPTIONS

AUTOMATIC FLOOD BENCH

Fill to a pre-set water depth through the use of a 12 volt pump and timer. Once filled, the bench then drains the water back into the same reservoir to be reused

CEDAR SLAT BENCH

1 x 4 Cedar slats in a solid wood frame. Provides a nice solid surface for potting plants. These can be removed for later season growing

WIRE MESH BENCH

Galvanized wire mesh in a cedar frame. Great for seed starting and easily removable

How To Order

1. Browse through our catalog
2. Choose a style and size that meets your needs.
3. Choose options and accessories to customize your greenhouse
4. Call to Order!
